SAMUEL OGUNTONA

Information Systems Student | Founder & Product Builder | Cloud Engineering

Ile-Ife, Nigeria | samuelbukumni@gmail.com | LinkedIn | GitHub | bukssamuel.dev

PROFESSIONAL SUMMARY

Information Systems student at Obafemi Awolowo University and founder of The Middleman, with hands-on experience building and deploying web products using Next.js, TypeScript, Supabase/PostgreSQL, Vercel, and Cloudflare. Experience includes product architecture, secure data access, payment workflows, testing, deployment, and technical documentation. Currently developing deeper capability in cloud infrastructure, Linux, systems, security, and AI evaluation.

EDUCATION

Obafemi Awolowo University — B.Sc. Information Systems | *Expected July 2029*

Ile-Ife, Nigeria | Relevant coursework: Information Systems Fundamentals, Human-Computer Interaction, Formal Logic, Decision Analysis

EXPERIENCE

Founder & Lead Developer | The Middleman | 2026–Present

Escrow-backed marketplace for digital products and technology services | themiddleman.com.ng

- Founded and built a Nigeria-focused marketplace from market research and system architecture through implementation and deployment.
- Built the application with Next.js, TypeScript, React, Tailwind CSS, Supabase Auth, and PostgreSQL, including Row Level Security for buyer and seller data access.
- Implemented and tested Paystack checkout and server-authoritative order/payment workflows, including idempotent payment recording and role-based access controls.
- Deployed with Vercel and configured Cloudflare DNS, email routing, environment variables, preview deployments, and production-domain settings.
- Authored architecture decisions, roadmap, technical/governance documentation, and platform policy drafts; coordinated work across engineering, design, product, and marketing.

SELECTED PROJECTS

S.A.M.U.E.L. | Python, PyQt6, Piper, Vosk — Offline-first personal assistant designed for hybrid local/cloud operation on a resource-constrained Linux computer.

Project SYNAPSE | Python, OpenRouter, JSON — Multi-model AI environment for independent brainstorming, critique, discussion, and structured transcripts.

SkillPrint | Product Design, Assessment Systems — Embeddable assessment concept focused on measuring demonstrated skills.

Personal Portfolio | Next.js, TypeScript, Tailwind CSS — Interactive portfolio presenting software, cloud, Linux, infrastructure, systems, security, and AI work.

TECHNICAL SKILLS

Languages: Python (foundational), TypeScript, JavaScript, SQL, HTML, CSS

Web: Next.js, React, Tailwind CSS, responsive interfaces, App Router

Backend & Data: Supabase, PostgreSQL, authentication, Row Level Security, database schema design, API integration

Cloud & Infrastructure: Vercel, Cloudflare DNS/email routing, Linux, GitHub Codespaces; foundational AWS IAM, EC2, S3, VPC, and serverless concepts

Tools & Delivery: Git, GitHub, VS Code, npm, pnpm, Node.js testing, TypeScript type checking, documentation, product roadmapping

AI & Automation: Gemini API, OpenRouter, AI-assisted development, multi-agent prototyping

CREDENTIALS, TRAINING & COMMUNITY

- HP LIFE — Agile Project Management (Completed, 2026)
- HP LIFE — AI for Beginners (Completed, 2025)
- HP LIFE — Customer Experience (CX) for Business Success (Completed, 2025)
- AWS Cloud Practitioner Essentials — Training / In Progress
- AWS Student Builder Group OAU — Member
- GitHub Education Student Developer Pack — Member
- Digital Training Academy Scholarship — Recipient, 2026
